# Who we are

Aran is a global leader in sustainable liquid packaging. With four production sites and a team of 250 employees, we supply eco-conscious Bag-in-Box solutions to customers in over 45 countries, from 1 to 1,500 liters.

Our expertise lies in designing creative, technologically advanced, and high-quality aseptic packaging for a wide range of industries. Trusted by leading companies worldwide, Aran combines responsive global service, fast delivery, and competitive pricing. Our leadership, flexibility, professionalism, and innovation drive the future of liquid packaging.

Innovative Folding Method for IBC's Pillow Liners

# IBATainer / NUTRiline<sup>aseptic</sup>

Aseptic packaging for large volumes

- for highly viscous food and sensitive liquids.
- IBC with flexible inner container (FlexBag)
- Integrated, heat-resistant outlet fitting
- Galvanized, easy to clean tubular steel frame
- Easy to clean plastic pallet without floor touching metal parts
- Ready-to-Fill, no assembly or pre-cleaning
- Optimized for sterile filling and emptying

-  Kosher certificate
- Food law Declaration of Conformity

Product	Inner container	Pallets		Valve	Elpo connection	AirAssist connection
	Volume Litre	Plastic L x W x H	Weight kg	DN 50		
NUTRiline aseptic (Food products)	600	1200 x 800 x 1013	36	V		V
	1000	1200 x 1000 x 1063	43	V	V	
	1000	1200 x 1000 x 1063	43	V		V

## IBATainer Variations

### BOTTOM FILL

The BOTTOM FILL system allows for both filling and discharging through the same DN50 Aseptic Valve. This streamlined process is perfect for handling liquids, particularly when filling from the bottom and discharging from the same point is crucial for operational efficiency and product safety.

### TOP FILL

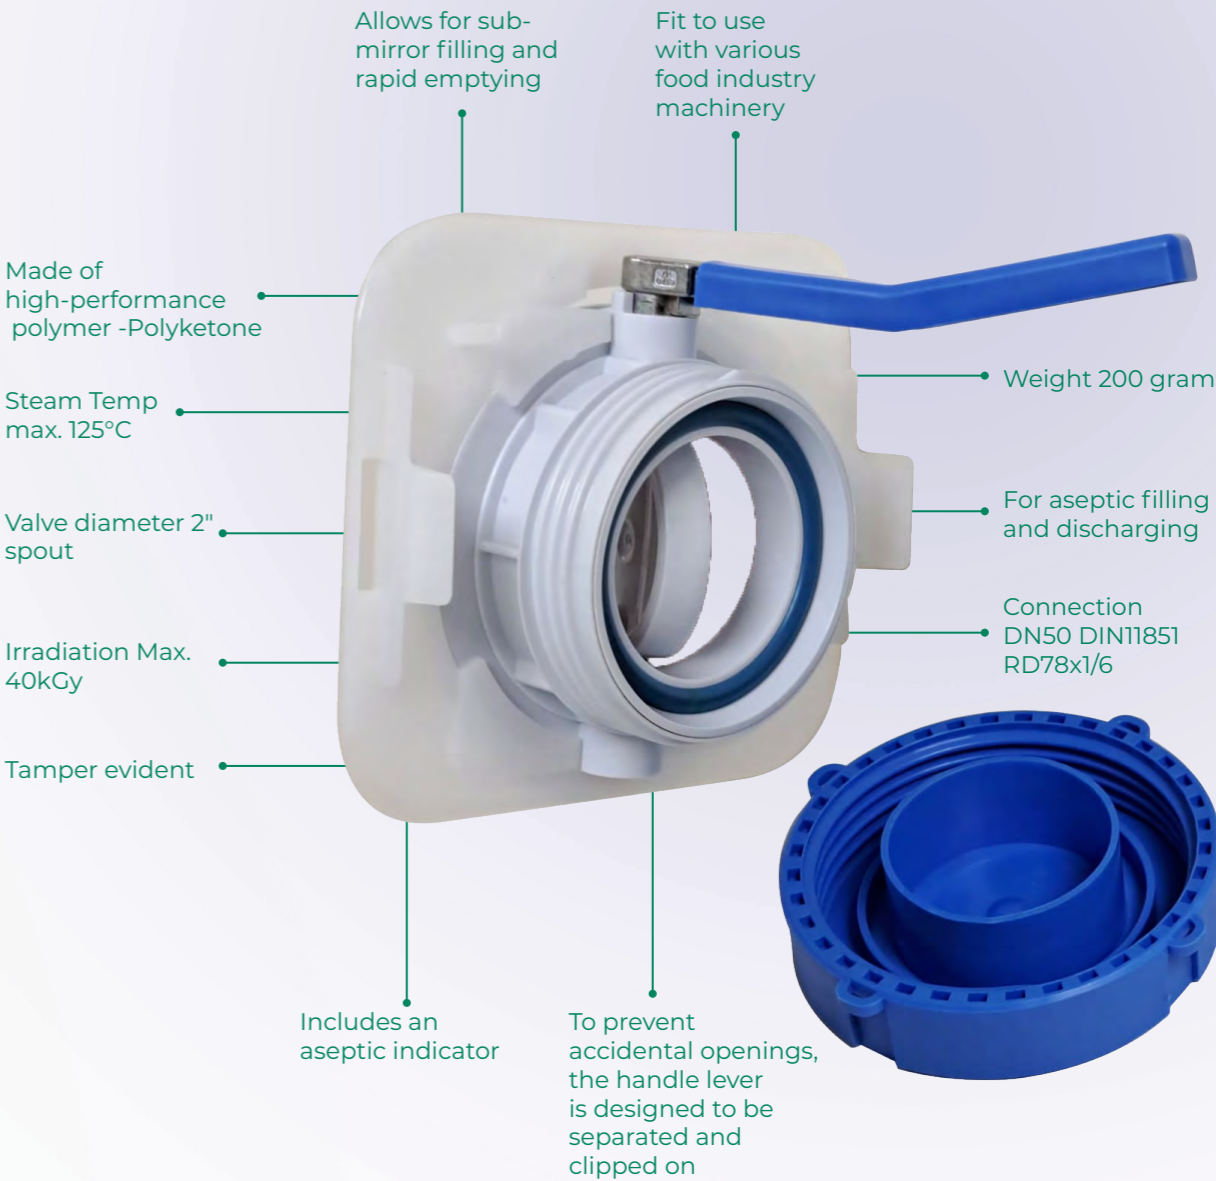

For products with low viscosity, the ideal option is the TOP FILL system. This variation ensures efficient filling from the top of the bag using an ELPO nozzle, with discharging through the DN50 Aseptic Valve at the bottom.

### AIR ASSIST

Our patented AIR ASSIST system uses air pressure to empty the bag without direct contact with the food. Compatible only with the Bottom Fill variation, it features an air pressure connector at the top of the bag, ensuring optimal product yield and minimal waste.

# Aseptic Valve DN50 BDG

Thread	V	V	V	V	V	-	V	2" Fenco Spout

# Innovative Folding Method for IBC's Pillow Liners

Our company has developed a distinctive folding method for the 1000-liter pillow bags, which guarantees that they will open independently during the filling process without requiring any prior actions. This method ensures that the bags remain stable during filling, and it eliminates the need for any manual intervention during the process. Our innovative approach to bag design and manufacturing has been met with enthusiasm from our clients, who appreciate the convenience, safety, and efficiency that our bags provide. We are committed to upholding the highest standards of quality in all of our products and services, and we look forward to continuing to provide our customers with innovative and reliable solutions for their packaging needs.
